The **secrets** to a
soft green lawn.
For **less** than
you think!

Alexander's
Landscaping
&
Lawncare
Service

Enjoy a lush green lawn without the work.
For less than you think!

The secret to a soft green lawn is experience and hard work. It begins below the soil, where the root system absorbs nutrients. **Aeration** allows air, moisture and fertilizer to penetrate down to the root zone and encourages a thick lawn. The right **fertilizer** nourishes the grass, adds rich green color, and extends the life of your lawn into fall. **Broadleaf control** prevents weeds and provides a soft carpet for summer fun. **Mowing** height must be adjusted to the season and the weather. **Let us do the work** so you have time to enjoy your new soft green lawn all summer!

Spring Service

A soft green lawn in summer begins in spring. We prepare your lawn and landscaping for a season of growth and health.
